29 May 1998

Dear Steven,

The changes have improved every program. The camera now shows the headlines that are easily readable. They all are approaching the production

you gave us -

The highlights of the week started with Brian and the liberal guest he had who would not admit that his president was a liar yet there it was in black and white -

I thought I had things to do then when I turned on the Westwood 15 CBS - I knew what was coming so I thought - This will make you mad but I could not turn it off. Steven is it too late to sue CBS again?

MIKE WALLACE gave us enough
new material to make such a suit
easy to win - I know now why he got sick.

One thing I had forgotten was
JUDGE PIERRE LEVAL reasoning that if
Westmoreland won damage would be
done to the PRESIDENCY. The exact opposite
would have happened - This would have
exposed where the problem had been.

The Joint Chiefs all started to
the White House to demand a change in
the way McNamara and Lee Johnson was
taking the war. Then they realized they
would all be fired and replaced by
others who would not be a problem.
In other words the civilians lost the
war as they did not know how
to win - They would not let the military
take the actions needed.

at a later date I will give you
a summary of other failures of McNamara.
There was the State Department taking
over in Columbia and stopping the military
half finished -

We are now in a similar situation
with the State Department ~~sp~~ ALBBRIGHT
whose attitude is send the fighters to
strike - or the troops to do aid as in
Bosnia - It will be years before these
troops can be back to a fighting
force -

I feel good when I see you
and Brian, Lou and others presenting
the truth - C Span has made it
difficult for Clinton News Network (CNN)
and ABC and NBC to stay on the air -
Many also as I BBC (we get it at
midnight over PRI then a Asheville NPR)
the early Editor WORSY- Then C Span at 7.
Keep up the good work -
