Dear Sir:

Being an avid fan of C-Span, I have lately been most annoyed by the reception I am getting of the C-Span channel. There is an interference coming thru like another voice and clattering noise on the channel. I assume it's on C-Span air wave. since my other cable channels are clear. It's terribly annoying and mostly in the evening. I would be most grateful if it could be cleared up.

It sounds like a 2 party
phone line where both
parties talk at the same
time - Could someone
be cutting in on your
air wave -

Keep up the wonderful
programs on C-Span -

Thank you
