Gentlemen:

One of your callers criticized the fact that AARP has an insurance program.

I would like to say "Thank God for the AARP insurance program". They insured my husband with medigap and hospitalization insurance when no one else would have, no questions asked, no medical history asked. They even paid 50% of drug costs (up to \$500 yearly). They always paid claims promptly and efficiently. Their insurance was very affordable for the amounts paid. They did not make any money on insuring my husband. Any other insurance company would have dropped him or increased premiums hugely; they did neither. (They have policy of not raising premiums for individuals; any raises have to apply to everyone within a state. This is a godsend to policy holders who have large claims.)

Those who criticize the AARP cannot possibly have any real experience with it. Their insurance program is the best.

Very truly yours,
