At one time when you called me and one time when I wrote you, I have asked you to air a discussion on what is causing our ineffective public schools. I've seen no response on TV.

Equal to drugs, our schools are a disaster, and all the proposals to rescue our educational systems show complete ignorance. I propose to you an hour show, not with educators nor with contrasting viewpoints, but with one or two non-educators quite knowledgeable about the issue to discuss who is causing our rotting educational institutions, how they are causing the decay, and how to correct the situation.

If you want to air the liberals' point of view, assign them another day.
