Programming:

On Monday AM, Ap. 5th following the call-in program at 8:30 AM., there was a "short" from Russia "explaining" to their own people the powers of the U.S. government. They spoke little of our Congress but told of the powers, services and salaries of the administration, and the thousands of appointments by the President. It was a simple explanation of the way others see us. We should all stand back to look at our own place in the world. Try to see the U.S. as others see ~~of~~ us. What they did say was true. Our Presidency has doubled in size and powers since 1982.

Please! Please make a habit of repeating this Russian T.V. Short!
