

Dear Sir:

O-KOSOVO

March 28, 1999

President Clinton is now a war criminal! His foreign policy agenda has been a monstrous failure. His administration and he personally are corruption personified. I truly believe the man is sick, mentally sick. He is a psychopath with a thirst for power of an egomaniac.

Clinton foreign policy negatives are: Haiti, Somalia, Iraq, N. Korea, Red China, Russia and etc. His personal negatives are: he's a traitor to his wife, his daughter, his cabinet and for that matter his country.

The attack on Yugoslavia is an international crime to divert attention from the Monica affair, Chicom campaign fund raising, Chicom spy coverup, the rapes story and the ARprison blood merchants of death reports. Lastly, his legacy.
