Dear People at C-Span,

I spend many happy days viewing C-Span. Thank you for providing information to help make me a better citizen.

The view of the House when nothing is happening on screen while a vote is being taken needs the return of classical music. I think the complaint about it was probably that the same piece of classical music was played. I love Bach
O - Programming

but that particular
Invention played over
& over would drive
anybody to distraction.

A variety was needed
& not a repetition of
one selection.

Please do it again &
use a variety of
classical selections.

I hope I never am forced
to live without

C-Span again.

Houston, TX 77055
