

I WATCH C-SPAN BECAUSE...

it is the only medium available in which to see live hearings from Washington on a regular basis. It enables me to see things as they happen and helps me form a judgment on controversial issues. I especially like the call-in interview programs because it makes it possible to learn first hand the thinking of people from all parts of the country. Since becoming a C-Span viewer I feel I have become much more informed. There is just no comparison with anything else to be found on television that puts a citizen in touch with his government or its leaders.

The opportunity to see our Representatives at work is something that was never possible before C-Span arrived on the scene. I was an avid watcher of C-Span in Dayton, Ohio, before moving to Albuquerque, New Mexico last year. I was sure glad C-Span was available when I arrived here, and only wish that all Americans had the opportunity to see it in every city and town in America.

There is just no other way to get as good and timely information through the normal media, as is provided by C-Span.. I guess what particularly impresses me is that C-Span usually is able to present both sides of an issue, and gives ample opportunity for all sides to be aired, thereby giving the discerning listener the chance to make up his or her own mind on any issue.

Here's hoping C-Span continues its fine programming for many years to come. I only wish you would simulcast so we could hear the programs when travelling in the car.

Guess I'm a C-Span nut.

Sincerely,
