Re. Council of
Conservative Citizens
Conference - C-Span
Speaker on the Panel

Dear Mr. Faylor,

Your speech today was enlightening to the
extent that I was apressed of your publi-
cation!

However, I was surprised to find that your
bigotry allows you to profoundly state
statistics regarding gross disparities regarding
misinformation that has long since been
disproven. Data gathering can and is done
in such fashion as to prove or disprove
what the researcher desires as the sought for
outcome.

In fact, too often criminal data is gathered
in just that way and even recorded or not recorded
to skew the results. It too is not the only data
categorically that is not pure and that one finds
difficultly in replicating! And if one uses percentages
over please

rather than actual numbers one can make mis-
representations to champion his or any cause -
conclusion's

As regards your flagrant misuse of gaps in
text scores to press the point that people of color are
inferior is a falacy long overturned. Even in the
days of Jacks who I opposed and repudiated.

America is the home of -- the land of the BRAVE
and the FREE long hailed in lyrics and Constitutional
Law! Once the 13th, 14th and 15th Amendment were
passed (not to mention other laws, executive orders
and Supreme Court decisions) the Bill of Rights holds
true, in this end of the 20th century.

Needless to say, somewhere along the line your
education has been woefully deficient. And I hate
to say this since our daughter is a 'Yalie' whose
Education for her M.A. and M.P.H. have given her an
entirely perspective. Perhaps it was Princeton or

Arch Bishop ^{both} through or her parents of whom hold doctorate
On maybe her own experience with the KKK have
taught us through experience what bigotry is and does.
It is miseducation! You know?

That I recommend "Thurgood Marshall Revolutionary"
by Juan Williams as a start for your reeducation.
