January 21 1996

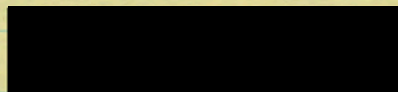

Today, January 21 1996, I received your program 'American Counts' C-Spon - The subject Single-Sex Education - I understood those who advocate the end of VMI as a single sex school - The choice of men women and men - I also comprehend the argument for single-sex schools - What I can not accept is the thought propagated by Ms. Moore as she speaks of the 'Stereotype' as if VMI as an institution would advocate this type of pattern for their defense -

There must be single sex educational institutions (with or without Federal Funding). Equally important there must be the choice to attend such institutions - Further there is the need for organizations for single race as say minority equal the the white institutions - At the 'grass roots' level I have spoken often; there must be grass roots places to be established made up of men or women, blacks, white, espouse oriental, Indian et al -

Even the rich have the right to private clubs and the like - What is my summary?

We Americans must never abdicate our right of choice - There is a place for exclusiveness - There must never be a place where a choice is not allowed or a place of end for that choice -

Richard

I trust you can make do w/ this  
rather poor writing -
