C- Spon.

Thank you for having the Iraqi
ambassador, Mohammed al Masbat, on yesterday
evening and allowing him to speak (unlike
Barbara Walters and Ted Koppel whose behavior
was disgusting.)

Today, Sam Cohen - inventor of the neutron
bomb - urged the U.S. to use his bomb on Iraq.
It seems there is no atrocity the Zionist led
U.S. govt. won't commit - so my guess is
the bomb will be used. We have adopted
Hemle's creed: "might makes right" - my soul
is filled with darkness.
