Over!

My father told me when I was a young boy. He said two brothers came over from England. One family settled North one family settled South. This according to father occurred several hundred years ago. If this is true, I am not sure. I know several relatives said we had kin in the north, before the Civil War. Everyone lost contact and I don't know where or how many. I remember asking Dad. why one family North and one family South. He said a lot of family did that.
