

Dear Sir/Ms

I enjoy your broadcasts immensely. There is so little programming available for the discriminating thinking viewer that your work is the actual justification I have for owning a receiver.

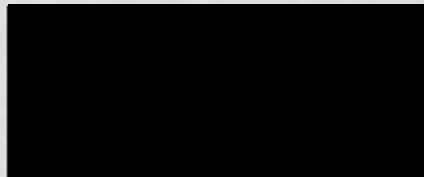

The programming suggestion I have is this: I would like to see the morning call-in show rebroadcast later in the evening, say 10 or 11 PM EST. This would separate the usual two broadcasts into different work shifts for most of your viewers. If we are unable to start the day with this program, at least we can end the day with it.

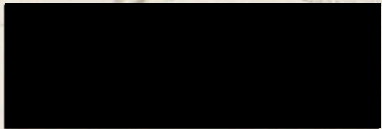

Also the morning call-in show on Friday morning is usually shown several times during the weekend. I suggest that other shows Mon.-Thur. get equal time for replays.

In addition is it possible to periodically list the recent legislative vote totals, with descriptions (usually displayed in graphics during the debate stage) and a breakdown of how each member voted. Consideration might also be given to displaying totals for time spent on the floor, in committee, missed votes, and attendance in general.

Once again, I offer my sincere thanks and heartfelt gratitude for the service you are providing to the American thinking citizen.

Another dedicated viewer,
