Re: interview with

& the Perbs - VS
The Mediterranean by
Fernand Braudel
Harper Collins 1992

Dear Byron -

Please get the book "Mediterranean"

The first 30 pages will give you
more insight to the Yugo Slavic
problems than anything you've read -

It is a book about 16th Century people
Climate, topography, life, trade in
and around the Mediterranean -

It is fascinating reading - (also about
religion which I left out in above list -)

More objective - AND will even
tell you where you came from, possibly.
After all there were only small towns, cities
villages then.

Happy reading
