Sirs:

I watch C-Span because it provides, audially and visually, history in making. Your programming allows me to participate mentally in the evolution of events so that the process of democracy is a live reality in my life rather than an impersonal force.

C-Span has enabled me to define my role of citizenship in a nation of unbelievable diversity. Prejudices and biases once automatic have yielded to deep and tolerant respect for opinions and views of others, which has resulted in a growing appreciation for self government and this democratic experiment.

I watch C-Span because it makes me feel good about our future as a people, and this is only because I feel part of it.

Thank you,
