Dear Sir: -

On February 12, 1991, I listened to Mario Samo who was speaking at Harvard, and would like my name to be placed on list for President. I realize he has said he would not run but I do not know if he could be drafted by the Democratic Party. I have wanted him to run a number of times and had hoped he might consider since our country and the people need a strong person to run this country.

and get the United States back on its feet,
and have the rating as it once had. The US
is being sold out and our people on
bread lines today.

Mr. Lumo states conditions as they are
and comes on strong on facts after facts
of the conditions today, and how
things could be bettered by all. He is
strong, smart and I do wish he would
consider to him, as a lot of people wish.
He mentioned to listen to the various
ones who have their hat in the ring,
which I have — the only one, so far,
has been Jerry Brown, who states the facts too,
and seems very strong.

Our young people need training — how to
do jobs and stress the importance of hard work
for accomplishments. I am a So. Citizen and in
my days had to work hard for what we wanted —
was not given — therefore, I learned what it takes
to have a home, etc. — and insurance, a head
account, and not depend on handouts, and not depend on parents ^{to get it}
So much for all of this but I do hope some change
will come and the future will look brighter for all.
Sincerely,
