C-Span
400 North Capitol St., NW, #650
Washington, D.C. 20001

Dear C-Span:

I urge you to examine this information and consider airing a video or covering a speech by any speakers from the John Birch Society. The successful transfer of this information is vital to the survival of our democracy. The mainstream media has collectively suppressed the spread of vital information regarding the Federal Reserve and the Council on Foreign Relations. The reason for this is that most of that media is controlled by the CFR. In fact, members of the CFR have been featured guests on many of your programs. Enclosed is a list of CFR members. The list includes many members of Congress, the last few administrations and cabinet members, media personalities and editors, and members of the Federal Reserve. These people are working toward a common agenda--they want a socialistic, one-world government under the U.N. There is more than enough evidence to establish this as a fact.

Please look into this matter and inform the public. Books and videos are available through the John Birch Society at [REDACTED] Appleton, WI 54913-8040. Contact [REDACTED] at [REDACTED]
[REDACTED]

Sincerely,

[REDACTED]

Enclosures

The Federal Reserve Bank (FED) can write a check for an unlimited amount of money to buy government bonds and the U.S. Treasury prints the money to back up the check. UNBELIEVABLE...IT'S TRUE! Read National Geographic - January, 1993, pg 84. Go to the library and read the books exposing this SCAM! The FED is a private bank for profit...Just Like Any Business! The FED is a privately owned, separate corporation so says the 9th Circuit Court ruling in Lewis vs. United States, 1982/83. Check the Encyclopedia Britannica or, easier yet, look in the 1992 Yellow Pages. The FED is listed under Commercial Banks, not Government. The FED is no more a Federal agency than Federal Express.

September 30, 1941, the Congressional Record per Congressman Patman revealed...The Federal Reserve Bank (FED) buys government bonds without one penny. Generally speaking, for each new FED dollar the government prints, the FED receives one dollar in government bonds. So we pay taxes to pay \$4 Trillion of national debt plus interest. The FED profits by selling these bonds to us and foreigners. We have \$4 Trillion of debt by printing \$4 Trillion of FED dollars. Taxpayers must now pay it off! If we printed \$4 Trillion of Real United States Dollars (not FED dollars), there would be no \$4 Trillion of debt! Why give the FED \$4 Trillion for Free? Read Patman's book (A Primer On Money).

On June 4, 1963, President Kennedy (JFK) Executive Order 11110 printed real U.S. dollars with no debt or interest attached because he bypassed the Federal Reserve Bank! Upon his death the printing ceased and the currency was withdrawn. Want proof? Ask any coin-dealer for a 1963 Kennedy dollar...It says United States Note, NOT Federal Reserve Note!

Today the government prints dollars and forwards the cash interest free to the FED. The FED exchanges this cash to buy newly issued Federal Bonds and collects the interest. Much of the government debt is owned by the FED banking system.

If Kennedy had lived and continued to print U.S. dollars, interest free, debt free, there would be no \$4 Trillion of debt! Why give the FED dollars interest free and allow the FED to use these dollars to buy new government bonds paying them interest? Kennedy's solution (Executive Order 11110), made this seem ridiculous. Why didn't the media tell the truth? We need to force Congress to make the change!

Article 1, Section 8 of the Constitution states that only Congress can coin (create) money. In 1935, the Supreme Court ruled that Congress cannot constitutionally delegate its power to another group and the FED illegally controls the printing of money through its 12 banks. Rockefeller and Rothschild are two of the original 300 owners of the FED!

Rothschild, a London Banker who dreamed up the FED, wrote a letter saying: "It (Central Bank [FED]) gives the National Bank almost complete control of national finance. The few who understand the system will either be so interested in its profits, or so dependent on its favors, that there will be no opposition from that class...The great body of the people, mentally incapable of comprehending, will bear its burden without complaint and perhaps without even suspecting that the system is inimical (harmful) to their interests." The FED profits from our stupidity and apathy! OUR FOREFATHERS TRIED TO PREVENT THIS!!!

ASK THESE QUESTIONS: Why pay interest on our currency? A typical incorrect answer is - The FED profits are returned to the U.S. Treasury. The truth is, the FED is a private bank in business for profit. We pay taxes to pay roughly \$300 billion in interest on our artificial debt and by special agreement, the U.S. Treasury receives \$20 billion in return. Taxpayers lose \$280 billion to the FED banking system per year. Much of the \$280 billion is paid to foreigners. Your local library has these dollar figures (Economic Report Of The President). The numbers don't lie. Why is the media beginning to condition us to change the U.S. Constitution? Are you for the Constitution - Against the FED? Why does the media talk of more debt and taxes and remain silent on abolishing the source of the problem? Congress' hands are tied because without the media they are not re-elected. Who controls the media? Help Congress...Help Us! Make copies of this brochure and expose the illegal activities of the FED to your friends, co-workers, relatives, etc.. Put a bumper sticker on your car (see order form). Be a leader, gather signatures on the available petition (see order form). AMERICA'S FUTURE DEPENDS ON YOU! You can change 100's of peoples' views by simply copying and distributing this simple one sheet of paper. YES...WE GIVE YOU PERMISSION TO REPRINT THIS BROCHURE. IT'S EASY TO WIN OUR COUNTRY BACK...HELP US!

Congressmen McFadden and Patman, Chairmen of a Banking Committee, plus others, attempted to abolish the FED. The problem was that the media remained silent so citizens remained ignorant. Today, 60% of IRS taxes pay interest on the national debt much of which is paid to the FED banking system. By abolishing the FED we can cut personal income tax by 75% and balance the budget with no spending cuts if we keep business taxes the same. If not, within four years, IRS taxes will only pay the interest on the national debt. McFadden said that the FED cheated us out of enough money to pay the entire national debt. Less interest-less tax-more people spend-more business taxes to collect. If Congress followed the Constitution there would be no debt! Congress needs public opinion to end this SCAM!

Why has the media remained silent? Rockefeller, is one of the original 300 shareholders of the FED. In July 1968, the House Banking Subcommittee reported that Rockefeller, through Chase Manhattan Bank, controlled 5.9% of the stock in CBS, and the bank had gained interlocking directorates with ABC. In 1974, Congress issued a report stating that the Chase Manhattan Bank's stake in CBS rose to 14.1% and in NBC to 4.5% (through RCA, the parent company of NBC). The same report said that the Chase Manhattan Bank held stock in 28 broadcasting firms. After this report, the Chase Manhattan Bank obtained 6.7% of ABC, and today the percentage could be much greater. It only requires 5% ownership to significantly influence the media. The FED knows if people become informed, they will demand change! By telling your friends, we can Force Congress to change! The FED can control the media by withdrawing loans! Ask any C.P.A.!

Rockefeller also controls the Council on Foreign Relations (CFR). Nearly every major newscaster belongs to this Council. The Council on Foreign Relations controls many major newspapers and magazines. Additionally, major corporations owned by FED shareholders are the source of huge advertising revenues that surely would influence the media. By controlling the media you control the population, the elections and public opinion. The CFR promotes the

United Nations (UN). Rockefeller-based group proposes parliamentary-type government for U.S. to change our Constitution! If Two More States Agree...It Could Happen! This means you will lose your God-Given Rights and Freedom as a citizen. You lose your religious, jury rights, etc. (see order form for The New Proposed Constitution - private banker research project). Congress claims we need this Constitutional change to balance the budget. The truth is that we should abolish the FED! ----->> THAT SOLVES THE BUDGET PROBLEM!

How did it happen? In 1913, Senator, Nelson Aldrich, maternal grandfather to the Rockefellers, pushed a bill through Congress just before Christmas when many of its members were on vacation. Private bankers funded and staffed President Wilson's campaign. When elected, Wilson passed the FED. Later Wilson remorsefully replied (referring to the FED), "I have unwittingly ruined my country". The media misled the public, and sponsors of the FED made ten promises, none of which were kept. Now the banks fund both Democratic and Republican candidates. The bankers employ members of Congress on weekends (nickname T&T club), as consultants with lucrative salaries (supporting documentation can be provided). Within months of starting the FED, income tax was created to pay for this new interest expense. The same 1913 law said the FED will pay no IRS tax! Our taxes pay interest on all new currency issued! Note: The bankers created this new legislation (Law), not Congress! Now the FED wants the New World Order (NWO) and Cashless Society (CS)! People oppose it! The FED's (CS) would absolutely control you!

THE SOLUTION: Currently all we do is exchange FED money (interest attached) for real U.S. money (interest-free) dollar-for-dollar. We should not be required to pay interest on our own currency. According to Benjamin Franklin, this is the same reason we fought the Revolutionary War. Thomas Jefferson said this about a FED-type banking system: "If the American people ever allow private banks to control the issue of their currency, first by inflation then by deflation, the banks and the corporations will grow up around them, will deprive the people of all property until their children wake up homeless on the continent their fathers conquered." Experts believe the FED created the Great Depression and inflation, and profits from people's misfortune. Before Congress, FED Chairman Eccles admitted the FED created new money from thin air (printing press) and loans it back to us at interest. Before the U.S. had huge deficits, we printed new money interest-free, without paying bankers interest. Today, the FED profits from huge deficits...and they are getting BIGGER every day!

Where did your bank receive the money for car/house/boat loans? From your cash deposits? Your bank can receive Loans from the Federal Reserve Bank (FED). The FED owners get rich by creating this new money to loan to your local bank! Sound unbelievable? Just ask any banker about the discount rate! That's the rate the FED loans to your bank.

The U.S. Government can buy back the FED at any time for \$450 million (per Congressional Record). If we bought it, we would pocket over \$450 million dollars in bonds the FED and the government own. So the real cost is nothing! The U.S. Treasury could then collect all the profit on our money instead of the shareholders of the FED receiving the profit. The \$4 Trillion of U.S. debt could be exchanged dollar-for-dollar with U.S. non-interest bearing currency when the debt becomes due. There would be no inflation because there would be no additional currency in circulation. According to the Constitution, Congress is to control the printing of money, keeping the amount of inflation or deflation in check. If Congress isn't doing their job, they should be voted out of office. Unfortunately, voters can't vote the FED or its Chairman out of office. The one who screams the loudest to keep the FED...probably Profits the most.

Publisher's Appendix

NOTE: Our listing of the names of those who hold membership in the Council on Foreign Relations is not meant to imply that all members are fully cognizant of the history of the organization or in agreement with its purposes as described in this book.
