**C-SPAN TELECASTS LIVE FIVE OVERNIGHT SPACE WALKS BY THE
SPACE SHUTTLE ENDEAVOR CREW; PROGRAM MARKS FIRST TIME
FULL OVERNIGHT WALK COVERED ON C-SPAN**

Washington, D.C., Friday, December 3, 1993 -- C-SPAN will telecast live five nights of overnight space walks by the space shuttle Endeavor crew starting late tomorrow night. Although C-SPAN has aired previous overnight space walks, **this is the first extensive coverage of the full overnight walk.** The air times listed below are subject to change, depending on when the walks actually begin each night.

C-SPAN will telecast the first overnight space walk **Saturday, Dec. 4, at midnight (ET) to Sunday at 6 am (ET).** That is the scheduled time for each of the following four nights -- **Sunday, Monday, Tuesday and Wednesday.** C-SPAN will pick up the space walks from a NASA feed. Viewers will be able to see the space walk constantly for most of the six hours.

The purpose of the 11-day mission of the Endeavor, which took off Thursday morning with a seven-astronaut crew, is to repair the blurred view of the Hubble Space Telescope.

C-SPAN will announce any space walk air time changes as they occur.

C-SPAN is available in 59.8 million cable households nationwide and is funded entirely by the cable television industry as a public service.
