Dear Mr. Lamb;

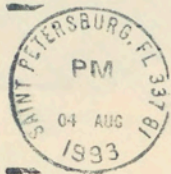

FINALLY, our country is going to be a winner.

The battle lines are clearly drawn. The Democrats in congress say with verve and conviction that their deficit fighting budget will be a great boon to our country. They say our country will be better off than we are now. The Republicans in congress have taken a position that it is a bad package and our country will be hurt. (country refers to both country and all people).

Now at this time we have the greatest test of CREDIBILITY we have ever had in our history. The best result of this "shoot-out" is that the losers leave town. The one who remains must have been an active participant in the battle.

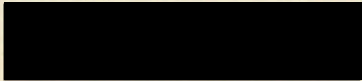

Let's not forget all this rhetoric. Let's NOT let the media and the politicians referee this battle and decide the outcome. Someone is WRONG and someone is RIGHT, NO excuses.
