Re: Savings loan fiasco etc.

Dear Sir:

As a registered Republican, I felt Compelled to write to you. You seem to have all the answers so please elaborate on the above. I would rather pay taxes to the Government to correct some of the trickle down mistakes ^{and} (Charge + Spend) than to pay for the S + H which is only benefited a few - the Bushes and a few others.

Tell the truth, Had Jesus Christ won the election and had he been a democrat you would all feel the same about him as President Clinton.

Respect the office - so our Global friends can respect the United States of America. Then when he makes a mistake, they can all vote him out of office as they did former Pres. Bush.

Read Mike Royko's editorial of several weeks ago about "Flesh Rush", Too bad we can't.

Is one loud mouth, Fat Draft Dodger who is getting rich by amusing the few of you who can't stand a democratic President with his distortions (an ex helmsman) hope the President + his Administration do get the Budget through so you can all

Start to pay your fair share to support the Government.

Incidentally, we have to help the mid-west, they are our people floating above the mess they did not create. Did you ever ask Bush where the money was coming from for the Desert Storm war? That was another joke.

The other night I watched as some of the Country (50) CEO's backed the President's proposal. Next came you & the one from Georgia & ~~that~~ I knew once more - you are all a joke - The one from Georgia is the one you are bragging about - You should see him from this side of the

Sincerely,

[redacted] from Pittsburgh

P.S. If you don't help to get this Country going & you'll all be voted out then perhaps we can elect some good men who care more about the Country & its people than their own pockets -

God Bless America
