C-Span,

Sir, We watch the call-in viewer programs as often as possible. Thank you for this excellent service to the public.

We would like very much to see a program with environmental experts as hosts discussing the impact on the Arabian desert of our invasion of this great number of people on the land itself. And, more important, the effect of the machines and constant air activity (andgunfire and bombs in case of war). What will this great increase in air pollution^{to} regional and global pollution on the ground and to the ozone layer?

We would appreciate a discussion on this very much.

Sincerely,

✓ CC: S. Trahern
