My husband, disabled these past 13 years, and I are sick and tired of the Democratic and Republican Presidents' broken promises and lies to the working American taxpayers. We believe it is time for an American Taxpayers "Bill of Rights". It is time we are represented and heard.

A Few Examples of Lies:

Take Bush, "read my lips", no new taxes! Whenever the news medias were on they crucified Bush, unrentlessly.

Take Clinton, "cuts of taxes for the middle class", again the tax payer sick and tired of over-taxation was lied to, insult to insult is the increase in taxes. Where oh where is the press? The actor Clinton time and time again takes it to the people, it still dose not cut taxes-but increases taxes! Where is the press? This issue is not Republican or Democratic but a tax payers' issue. It's the economy, stupid!

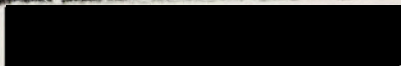

When did the IRS become welfare? The so-called earned income tax credit is an unearned income tax credit! Eligibility is you have to have a child and you did not have to have paid taxes. The retired and disabled who have paid taxes with a much lower income are not elligible.

The greatest lie to the American people is that an employer-employee health insurance gives the tax payer health care. Don't even mention dental, eye-glasses, medication, and all other survival means so desperately needed. You see, the American tax payer is not allowed to break the 11th commandment, "Thy shall not get sick"!

The Democratic and Republican Congress and the president continue to lie by way of a likened news medias. Where is the press?

My husband and I are sick and tired of the shaffting of the tax payer .
