I am sick & tired of your News Dept. constantly harping on the good quality of the "J" Cars!

Look around -! - How many good running "J" cars, 7-8 yrs. old do you see on the street?

Ask the people of Florida & Coast States about the quality of "J" paint jobs - that the "J" won't stand behind?

Ask yourself: - Is the average American better off now, after "J" Imports; plus the building of 2200 "J" Tax-abated plants in the United States?

You're making the recession worse!
