Dear Sirs:

On the evening of 1-30-93 I suffered through an AIDS discussion between Dr. Anthony Fauci and Larry Kramer. I am at a lost for words to describe the vitriolic diatribe of Larry Kramer and the obsequiousness of Dr. Fauci. What is probably as amazing is why your moderator Steve Scully or your program producer did not pull the plug on Kramer.

Your program did not elicit facts that AIDS research receives a disproportionate share of funds as compared to deaths caused by breast and cervical cancer, heart disease, lung cancer, emphysema and a host of many other incurable life threatening diseases. Your program did not elicit the fact that, with exception of blood transfusions to hemophiliacs, AIDS is a self inflicted disease resulting from an exchange of drug needles and **SODOMY**. Why is not the same attention and compassion shown for other self inflicted diseases as lung cancer, emphysema, heart disease and cirrhoses? The obvious answer is that it has become **POLITICALLY CORRECT** to embrace the AIDS myth. The notion that males or females can be infected with AIDS by NORMAL vaginal intercourse is pure **BALONEY**.

On the 12-1-93 evening news our senses were again assaulted by a sexual deviate, A.K.A. Luke Sissyfag protesting to President Clinton. His theme and demeanor were the same as Kramer's the night before. How long will we tolerate fagots dominating political discourse? I say enough is enough.

The queer population want AIDS to be declared an epidemic and plague but the fagots are loathe to admit that AIDS is transmitted by the deviant sexual practice of SODOMY. In years past, epidemics and plagues were controlled by quarantine. Cuba has successfully controlled AIDS by quarantine. Why are we incapable of this forthright approach?

I believe the AIDS crisis could be easily resolved as follows:

- ▶ Quarantine queers with AIDS and intravenous drug users.
- ▶ Dismiss Dr. Fauci and employ an AIDS director who will not fawn over and do the bidding of homosexuals and their sympathizers.
- ▶ Curtail funds to AIDS research and medical assistance to homos with AIDS. This would reduce deviate behavior.

Enough is enough! We cannot allow a small deviant population to influence this Nation's health resources. By copy of this letter to the President, Ms. Donna Shalala and members of Congress, I implore that common sense will be restored to the AIDS problem.

Young, very truly

c: President William Clinton
Ms. Donna E. Shalala, Sec. HHS
Sen. Tom Harkin, Chm. Appropriations Subcommittee
Labor, HHS, Education and Related Agencies
Rep. William H. Natcher, Chm. Appropriations Subcommittee
Labor, HHS and Education
Sen. J. Bennett Johnston
Sen. John Breaux
Rep. W. J. "Billy" Tauzin
Dr. Anthony Fauci
Mr. Larry Kramer
