Dear Sir,

I am tremendously impressed with C-Span.
You are probably sounding the death knell
to some of the radio and TV programs and
I say Good Riddance to them. Since it is
almost impossible to get in to you by phone
I am taking this means to pose two questions
that I hope you will ask one of your
guests as appropriate.

Mr. Dole seems to refuse to believe that
George Bush is no longer president and
takes delight in saying that more people
voted against Clinton than voted for him.
Using his figures in another context it
shows that more people voted against Bush
than against Clinton.

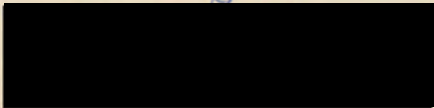

Immediately after the election, when
figures showed that the economy was
improving, Mr Dole referred to it as the
Bush recovery. Since these figures have
again turned sour you don't ~~here~~ hear

anything more about this "Bush Recovery".

One of the major faults with our elected representative is that they don't think we can add or subtract. What is it about politicians that makes them think they are so much ~~smarter~~ smarter than the people that elected them. On second thought maybe that's why.

I enjoy your program immensely and look forward to it each day. I'm 75 years old and this is by far the best idea I've seen

Thank You
