

3-2-94

Dear Mr. Lamb;

I read in the newspaper this morning that you are no longer going to do the wide-angle views of empty seats while a speech is on.

If you're going to broadcast the speech, it seems like the audience should know who is listening to it (if anyone). To pretend that there is an audience (when there isn't) is very deceptive.

What happened to the people's "right to know"?
