Gentlemen,

I watched your call in program on drugs Monday morning. The mental attitude of many people who called in disturbs me as much as the drug problem. They would like to take up where Stalin left off. He sent people to Siberia and had others executed. These callers want to send people to a prison island and execute others. They do not want this for their own. They see visions of the underclass shown on television in connection with the drug problem.

Does this country want to

trash certain people? By the way
the underclass in this country are
all races and colors. You Know
that the drug dealers and users
are from the bottom to top classes.

I am white lower middleclass
and I remember what the Lutheran
minister said happened to him in
Nazi Germany during the Holocaust.

A listener
