To whom it may concern:

I watch E Span because politics is my hobby, I am retired and living on Social Security. I am a white male 78 years old.

There are many people who say that they are interested in sports not politics. They will spend hours talking about the last heavy weight bout and how they think the judges made the wrong decision. To these people the following questions should be asked:

Aren't you interested in how much unemployment compensation you can get if you lose your job and how long you can get it?

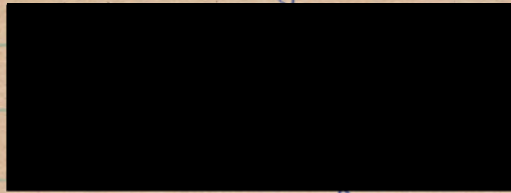

Aren't you interested in how much you can get in Social Security benefits and how soon you can start getting them?

Aren't you interested in how much is deducted from your pay check for taxes?

Your welfare depends on putting the right people in

Office as president, congressman
governor and legislature Over em-
phasis on sports leads to voter
~~apathy~~ apathy and distracts from
its real things

Sincerely
