Why did you choose not to carry (or cover later, in full) the testimony of Ross Perot to congress about The North American Free Trade and Finance Agreement?

Why did I have to order a copy of it from the GPO to hear/read what he had to say.

If you wish to keep your edge on the news we average citizens need, and want, to know about, I feel that you need to cover what is truly world and local news. If you want to know what is considered to be a good example of news with us, the average citizens, check out the BBC, or ECO, or The Japanese News Service.

This was to give you one little groups opinion on your recent coverage of Congressional news.

Thank you for your time,
