Mr. BRYAN Lamb.

DEAR SIR:

I wrote you a short time ago & do hope my letter did not upset you. I am also one of those people who are disabled due to Auto Accident & who is still trying to get his Social Security started. This only to let you know I am also short on money as are a lot of your watchers.

I have tried to call & was unable to get through. Partly relieved because I figured the cost of the call was more than I should spend.

One statment, One Comment & One Question.

1. To explain why I said I Liked most of your programs. When two people just sit & argue & sometimes loudly about a topic on which neither gives any proof that confirms their point just leaves me confused.

2. Construction cost, prices normally charged & the cost the Government actually pays on some of items in controversy would help.

if your network could let people mail in questions & your staff could sort through & pick out relevant ones for some of your guest. Once a month or every so often should this not impose too much expense on you. One or two before or after the call in section of the program.

3. Where do you think Americans want to draw the line on aggressions. Do they really want to wait until the aggressor get to the U.S. If one should then do we choose state by state because of what they produce or how much good they can do for this country. Speaking of lives lost & damage done to cities do we realise what a war here would produce. There is no good place to fight but so far the aggressors have been stopped over there. When we don't they will just get stronger & will surely come here. If we barricade them out we also lock our self in.
