Brian Lamb:-

You should talk to Jack Van Impe if you think there isn't a One government rule in the makings on this planet. He states that it is in the makings to put this on the ballots to be voted on.

You wouldn't like to call this treason is that right. If any of us has any amount of intelligence then we know that there are many ways to destroy a nation and as far as I'm concerned behind your back and under the table dealings are the worst kind of treason.

This is a part of this so called tri-lateral free trade world.

Whats so crummy about this whole thing is that anytime any one calls into your program and mentions it, you act as though they they are out of there head.

Your a service program, right, well you need to look for the truth if your really are interested in the well being of life of this planet.

1. Go through the U.N. meetings of the Bush administration.

2. Why so much money for internation spending on a planet where every nation can have the best monetary system in the world.

3. A cat can smell a rat long before it sees it and I will say the rat was all ready visible when I hear the body in the U.N under the Bush administration say that Japan belonged to the U.S. then all this garbage went on about the trade deficite with Japan.

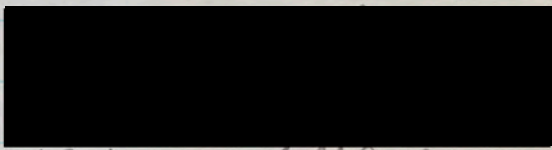

Smell of the rat hit you.

4. Free trade - then I guess I don't know what free trade is. Didn't know free trade meant that big companies of the big nations weaselling in on the other nations of this planet, for cheap labor and the mineral resources of those nations was this.

5. So my question is what do you know about the company that owns C-Span? Russian news, government of Canada all so to viewing public, Englands question to the priminister this seems to fit more in the relm of entertain-ment rather than to look into anything for the truth.

6. So maybe you'd really like to tell the public how you can say that your trying to inform them about anything.

Go through C Span coverage of
the U.N.

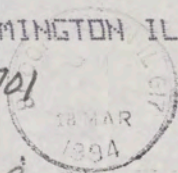

Bloomington, Ill. 6/17/01

When you get to the nitty gritty
of it what do you learn from the
goings on in the house of
representatives when its the voting
on a bill that only those in
Congress know. Sure is fact that
no one knows what these bills
are all about before they come up
for vote is there.

How many of the citizens of
this nation do you suppose
can pay the price of anything
that comes up such as the health
care bill, and how well do you
suppose they would understand
it?
