

THE PRESIDENT'S COUNCIL ON BIOETHICS

5 April, 2004

Dear Mr. Lamb:

Glad that I bumped into you
This morning. I appreciate your
encouragement. Even more so I
appreciate your contributions to
American culture and intellectual
life.

Here are the collected works
of The President's Council. Beyond
Therapy and Being Human are my
favorites: The first shows how new
biotechnologies are compelling us to
consider deep questions of our humanity;
the second provides wonderful
resources for thinking about just
such questions. Enjoy.

Sincerely,
