

Dear Bryan: Here I go again: 8/25/99

Why can't you have name of your host on show, shown so we can learn their names? When they show them (which is seldom) they are displayed only a few seconds.

Alice Rivlin was on this am. Host's name was not observed by me. They showed her "Former position" but not her "Present one". Why? Why not have host ^{have the guest} answer questions that callers ask, rather than let them "doodle about the question" but not answer it, as Alice R is a masterful at (This seems to be a characteristic of women - not being sexist about it - but by 60 years of observation of women in action). Why is low unemployment a bad thing? You do a great service! [REDACTED] J.W.
