To whom it may concern,

I was extremely disappointed in your SEP 13 programming decision to pre-empt live coverage of the subject conference in order to show a re-run of the Chinese Communist Party Opening Conference. Isn't it in CSPAN's charter to broadcast events that are educational to the American public about governmental/political processes in the United States? The Christian Coalition has a great impact on American politics and you chose to pre-empt one of the most well-spoken orators of the 20th century (Amb. Alan Keyes) in order to present a re-run of some communist punks! It is no wonder that our electorate is so woefully misinformed when CSPAN, one the the fairest and most unbiased news networks on the air, can make such a blunder! Please present Amb. Keyes' speech in it's entirety and let me know when you plan to do so. Also, in the future I would hope that you would not make such a horrendous mistake again.

sincerely, a normally avid CSPAN viewer,
