

Please read

I hope you take the time to read this. I have waited a long time to get the address of your Station and Feb. 14. someone finally called in to ask for it. I think all stations should have to give their address so people can voice their concern about fairness in media. You have people calling you claiming to have voted for George Bush, that will not this time. Those are Democrats being skunked again. Intellecs are very deceptive. Again, you should altertnate your call-ins so that Democrats don't stack the deck.

Sincerely

Coralville, Ia

Dear Sir,

I finally heard the best question I have heard so far on CSPAN. The question was - "How can I reach CSPAN to ask a question".

I have been waiting along time to voice my views about Cspan

Why don't you ask tough questions? Why don't you alternate your calls? also the next time the environment subject comes up, say something about the coal age. If you are too young to have experienced this back in the early part of the Century, ask anyone over 60. We are still alive, the sky didn't fall.

The only reason there is concern now is because high tech has discovered this so called hole. Also, mention our labor force which is a major reason we are in such bad shape. Unions priced themselves right out of work, also there are too many

People going to college. A lot of them are not smart enough to carry these diplomas. These people should be the leaders of the blue collar workers. It might sound like I am rambling, but I am writing these thoughts down as I think of them.

Why haven't you asked the Democrats how much they expect to get from a tax on the rich? Tom Waskin has changed his character in the last year. Go thru his record while he was in the Congress. He was weird, he once proposed fueling submarines with coal instead of nuclear fuel. (His home county produces coal. I wish I could see him to ask about the chimney. Ask the Candidates how they would get all with Congress since 2 or 3 of the Candidates are starting to sound like Republicans.

Saturday morning I watched Close up and you had three high school

kids on - Now those kids do not reflect the views of other kids, because these were the smartest of the school and this type do not think ~~that~~ like the common person, and besides, they tend to listen and do as others of their ilk, so they are subject to propaganda from the left, such as Mother Earth etc. I think you should look in the Congressional Record to examine the candidates records so we can make up our minds. Sound bites do not do it!

I wish we could call people in Washington patriots instead of politicians.
