

TOP TEN LIST 1995

Viewer

10. Don't look for a cut in farm subsidies. Sixty years on the welfare tit for rich farmers isn't too long; only two years should be the cut off for 'Welfare Cadillac Queens'.
9. Do look for a repeal of the assault weapons ban and gun restrictions. What this country needs is: more law and order, more prisons, more executions, and a greater right to kill by private citizens.
8. Don't look for term limits for Congress to be passed into law. Would you participate in your own suicide?
7. Do look for an increase in the defense budget. There are alot of rogue countries in the world and its our duty to control them. The Canadian or Mexican armies might try to take us on also.
6. Don't look for any health care reform. You don't fool around with a eight hundred billion dollar industry, Doctors, hospitals, and insurance companies except at your own peril.
5. Do look for a capital gains tax cut and other tax cuts without real offsetting spending cuts. We can put it on the Visa card like President Reagan did; whats another three trillion dollars on your grandchildren?
4. Don't look to shut down the space program. Its much more fun to fire rockets in the air then to build televisions, high quality cars, V C R's and other manufactured products. This is a very high priority welfare program.
3. Do look for mild tort reform. The lawyers incomes are moving ahead of medical Doctors and we all know medical school is more difficult, expensive, and takes longer then law school.
2. Don't look to stop immigration legal or illegal. Hyphenated Americans love bringing in 'The Brothers' anyway they can.
1. Don't look for more spending of money on education & vocational training for the disadvantaged. We need to turn control back to the states and let things be handled at the local level. The model might be Mississippi and Alabama as they ran things about 1946 or perhaps Texas with the Texans in charge of the government now with the guiding advise of Editor Bartley of The Wall Street Journal. By the end of this year the embittered 71 year old WW II Vet and the ugly, funny talking Texas Senator should be in full run to replace the girl chasing young President and his uppity strong wife so hopefully will see alot of quick political action before the end of the year.

Most Americans are aware that Senator Robert Dole served in the United States Army during World War II with great distinction and valor until he was very seriously hurt. The Army tried to return him to health but, at a certain point told him there was nothing more they could do for him. Senator Dole then returned to Russell, Kansas.

The local citizens took it upon themselves to put a cigar box on the counter of the local drug store and citizens donated money for rehabilitative surgery for Bob Dole. Mr. Dole then convinced a surgeon to operate on him for free and the cigar box money was used for hospital expenses.

Unfortunately every citizen is not as smart or dedicated as Senator Dole but, never the less the Senator probably thinks the 'cigar box' method is the answer to any short commings health care might have in this country.

I feel reasonably sure holding to that view also are: Senators: Mack, Durenburger, Dornan, Nancy Johnson, Bill McCollum, Newt Gingrich, and Bob Kerry. Also in that camp no doubt are Representatives: Kasich, Cooper, Archer, and 'Mr. Warmth' Richard K. Amey of Arlington, Texas.

If you have good health insurance that can never be taken away be sure to vote Republican and keep all these gentlemen in office because they will all block health insurance reform worthy of the name until you die.
