

Mr. Brian Lamb
C-Span
400 North Capitol St. NW #650
Washington, DC 20001

May 3, 1994

Dear Brian:

The most dangerous assault weapon in the U.S.A. is the mis-information being broadcast daily by Clinton & Co. This is the most destructive weaponry ever foisted upon citizens anywhere in the world. The President and some other elected officials each took a solemn oath to support, defend and uphold The Constitution, but are now seeking ways to abrogate that venerable composition. Worse yet, they have engaged and encouraged other people of power to help in this destruction. Most of these people are not elected, but appointed or merely assuming a power position.

Your tax money and mine is being used to sell us these destructive messages:

Certain limitations on freedom of the press and freedom of speech are being pursued. Our freedom of religion has been twisted to suit the liberal agenda. The right to keep and bear arms is being bent by anti-hunting forces, yet the second amendment makes no mention of hunting. The second amendment was written for the purpose of providing the people a last-ditch means of resisting oppressive government. Steps have already been taken to suppress some rights of peaceful assembly. Our freedom from arbitrary search of our homes is being threatened.

If these people cannot gain their ends by one means, they are continually developing other methods.

They want to stop cigarette consumption by placing a one or two dollar tax on each pack. Next they will use a two

dollar a gallon gas tax for the stated purpose of controlling air pollution - but maybe the real aim is to control travel by people who disagree with their philosophies. There are rules in place right now to require strict pollution controls to be retrofitted on all automobiles which can cost \$450.00 per car. Think of the devastation this is going to cause Senior Citizens and other limited income people who MUST have use of autos for work, shopping, doctor visits, etc. At the same time they do not require large diesel trucks, busses or railroad engines and off-road equipment to stop pollution. Big business and labor lobbies wouldn't permit this kind of law to be put on the books.

Are you tired of playing against a stacked deck? Write to Clinton & Co., your representatives in Washington and in your State Capital and take Harry Truman's advice:

"GIVE 'EM HELL."
