Dear Sir:

I wanted you to know how very much I enjoy your various programs. I watched the congressional hearings and many of the regular programs and the last couple of days I was THRILLED to be able to see and listen to some of the National Women's Political Caucus meetings.

The wonder and blessing of television!

I obtained my degrees in television production at San Bernardino Valley college, they have one of the first PBS stations and as a student I was able to work on real shows and be paid as well. I then came to Chico from Southern Calif. about six years ago and obtained my BA in Communications at California State University Chico.

I hope to be able to produce educational videos and interactive computer assisted programs as well as informative and entertainment programs.

I want to thank you for providing these wonderful and informative programs. I was especially thrilled to hear Betty Friedan, Geraldine Farrarow and the others, as I was and am a woman who has struggled many years with the discrimination and obstacles placed on me because I was female. But that is another story, I just wanted to have you know how much I appreciate your programs.

Please let me know the current publications you have available and their costs.

Very truly,

[REDACTED]
