C-Span
460 North Capitol St. NW Suite 650
Washington, D.C. 20001

Dear C-Span:

Congratulations on Twenty-Five Years of your service to our country. I have been watching and recommending your program at least since my retirement in the years just before Ronald Rogen's nomination.

I have done all I can do to try to get Comcast in Toms River New Jersey to replace C-Span II. It has been impossible!

I am a staunch supporter of President Bush and his administration. Once an Independent but the extreme behavior of the Democratic party to destroy a man of vision and, in my view, a man of honesty and intregity, I could never vote for any democratic unless their people change their destructive and negative opinions.

Two facts I believe the Democratic party pursue are the idea that Christians all want to make abortion illegal. No one who understand the harm that would to to women who always will seek solutions to their

desire for an abortion. More over, doctors will in following such a law would be unable to serve this need and condemn women to illegal and risky solutions.

A second item the democratic present of: the position Christians take on homosexuality is very innacurate. As a person who has been an active Christian for sixty years I have the opinion that almost 50% of Christians do not condemn those who do not choose something which comes to them as normally as heterosexuality finds themselves in their life style.

Many Christians have members of their families who are homosexual and they are accepted + loved as much as their other children.

One more suggestion I would make, is to find almost any minister as a spokesman for Christians who are not leading what I call fundamentalists who do not speak for most Christians. Jerry Falwell and Pat Roberson do not speak for me or anyone else I know.

I have tried many times to call-in, but it has been impossible to get through for the last four years. Usually someone else will express my feelings to satisfy my need.

Thanks
