If the male leaders were better social world managers we would not have so many health problems. People would not be using drugs, they would not become alcoholics and women would not want to, or NEED to, abort human life.

I believe more in the ounce of prevention than I do in all of the lbs of cure that are being used.

We have to know THE TRUTH, in order to know how to prevent - but human minds could never be given to doing that because people always had to give too much thought, mind, and time - to just getting what they NEED to stay alive, reproduce and raise off-spring, that have the same needs and instincts their parents have, live out the life cycle of all two sex species, in the two sex plan, that obeys natures dictates.

The male leaders have never known how to manage human affairs, on earth. It's the mother of the inventions religions, heaven, prayer. If the male leaders admitted they are ignorant it would make them lose control and control is what males, in the two SEX species, including the human, fight about - because being in control insures their getting all their NEEDS met - Study the males in the two sex species and you know they are alike, in most respects - Man's wars are male fights that are as territorial as the fights of any of the other males.

Men get their young males killed in their male fights, that is a male characteristic - all of the sex related social problems that cause so much trouble, suffering and death - make it evident - the instincts in all two sex species are the same.

It is a limited resources earth that is trying to support lots of two sex, reproducing species - it has its species carrying capacity, just as nations have their people supporting capacity -

No controls were put on people to let them know how much is enough in getting their needs met - so it has to be regulated, and the male leaders never had to give thought to knowing how to get that done because - what stops the male - where he has gained full control, in our social world.

He is not as handicapped by his off spring as woman is? He was FREE to kill people. It has always been his male method - His doing it is recorded in history books.

What stops his doing it? Belief in doing it is an established male belief where church and state are not separate. The leaders are MALES - the governments have male leaders and you don't get the truth about the male of the human species learned and revealed where his not being as handicapped by his off spring as woman is has let him gain

control. Look at Congress, the nations leaders, parliament- the UN- at the meetings in Russia. Take a good look at Samolia, the Middle East, Bosnia Ireland , El Salvadore - there they are males laying waste to all that is being laid waste to, including human lives, where males are fighting each other-

Why do men do it- they do it because they are male, they have male instincts that are the common denominator in all males, in the TWO SEX species.

The human males brain works under the influence of the same kind of male instincts the other males have, they are strong in the human male, his brain is weak in comparison, no match for his male instincts, they control his thinking, overpower his reasoning power and its the mother of the inventions, laws, government, the reason why men wrote the Bible- its laws, commands make that book relevant, they relate to living, not DYING! What the writers of the Bible tried to get done was- control the male instincts in the male leaders so they would be forced to use their brain, mind; think, reason their way out of their social difficulties, solve their social problems the more civilized WAY. Nations rise and fall because the leaders are MALE. I looked at the great long list of universities and colleges in America , alone, I looked at the male leader in our government and could not help thinking- with all that, supposedly, representing brains - why is it that we still have wars and rumors of wars and no end has ever been put to crime ?-

We cannot get humanities social ills cured because where the male has gained control, and his male beliefs are so well established- his religions, his belief in fighting wars, etc., the truth about man, the male of the human SPECIES cannot be revealed.

Speech and press are not FREE, they are being abridged by the established beliefs of male leaders, in religions and governments - the beliefs of MAN.

It has a lot to do with the health and welfare of all humanity. If men knew how to manage human affairs, ON EARTH- humanity would not have so many unsolved social problems-

We can hold male leaders responsible. They tell humanity what to THINK and believe.

What I see in humanities social problems is the failure of the male leaders old, just a little too well established, MALE beliefs. Where the leaders have been MALE, for so long - it is made evident- the MALE mind, the OLD, established, Male beliefs have been tested, tried and found to be WANTING. Peace prizes are a waste of money where belief in fighting wars is an established male belief. It is interesting to note- church and state are not separate in that belief- the leaders are MALE, they experience living as males, it gives them a male perspective that puts limits on their social vision - they are not both sexes, they have no idea as to what being female is like, they could never see thru the eyes of the human female. If it takes both sexes

to produce human life it takes input coming from both male and female minds to do a good JOB of managing human affairs on earth- If men valued human life the killing they have done, in their male fights, could not have been done. If the right-to-life is an inalienable right how can people send their young males onto man's battle fields? Do the American people have more right-to-life than the young men have ?

No pills can cure hypertension in me- i lost my self respect and developed an overwhelming sense of guilt when I realized that I was a part of system that sent boys to their death, so that I could go on living- are the American people worth the sacrifice that has been made to give us what we have in America- shouldn't it be used to make sure it will never happen to boys again, and are we doing it ?

What is destroyed, when people are killed is humanities most valuable asset, the human mind, brains- we know what they can do-given half a chance. What is being put into them by the MALE leaders, the educators, where the leaders are male, the communicators is what makes all the difference.

The input in managing human affairs is coming from males that are on the reproducing level, in twosex development- it explains the great interest in sex - male fights- lots of things.

When I realized what I had done to my children in letting them be born, where the human species is suffering what it is on planet, earth. I lost my cool and believe me- its not exceeding PEACE that makes me BOLD. It became a heavy, heavy hangs over my head, what can I do to redeem - just a little SELF respect.

I know selling the idea that man, being male, makes him the whole problem. We cannot SELL the idea that his male beliefs are established beliefs that are wrong- where he has gained control- so what <sup>is</sup> there to do but be covert operators, write letters - let men be the up front speakers but give them your ideas - its what all OLD women, in America, can do for their country.

The answers are not all in the books, yet, and in fact- what we have in our libraries is what men, think and believe- what we get thru our male run media is male propaganda.

Where there is a will, there is always a WAY-

Male beliefs, male management of human affairs, on earth, has a lot to do with humanities health and welfare - "its broke, it needs fixin."

Why haven't they picked up on this nations being managed by a herd of donkeys - It took twenty mule teams to haul loads of Borax out of the mines- will the donkey team be able to pull this nation out of the mire its in - it remains to be seen !

AS long as money can be made off of the existing lbs of cure- prisons, hospitals- Dr.s send people to the pill peddlers, its the easy way - knowing what is causing

the problem takes too much time. Knowing why people do what they do takes too much time and effort- What old people need is more Dr, Jack Kevorkians- because DR.s do not know enough- Men would rather fight wars - than to give plenty of thought, and time, to doing human LIFE saving research- Drs could do more on the job research- they could not see so many patients in a day, if they did it- but they might learn the truth about diseases and know how they could be prevented- They have people over a barrel and they sock it to them- the same is true of lawyers. They are advantage takers- the bleeding , today, is done in another way-

and I am a D.r.s daughter- my father took barter, - there was no great division of labor in the field of medicine, and he only lived to be 54 years old - talk about STRESS and coping - the things that happen to people never keep office hours - Dr."S , now, are not put under the kind of pressure and strain, that Dr.s were under- long ago- but when, what is being learned, is not being made available to people, in general- so they could , help diagnose their own ills- some magazines do publish articles that help - we need more of them- withholding information should not be allowed- what has been developed is priced out of the reach of people, in general -- We do need to give more mind and time to knowing how to PREVENT- We can know the TRUTH and it does FREE us. That has been proved time and again. it is what we have MINDS for- where humanities SALVATION lies- In our human, two sex species, being blessed with fact finding brains and both sexes have them, and We cannot tolerate having the male of our species control the mind of women with his OLD, tested , tried and found to be wanting MALE beliefs- Human females minds have got to be freed from male control so the female point of view can be expressed as fully and freely as the male has been expressing his for, " lo, these many , many years. " It is total male indoctrination- We need some NEW beliefs.

I can't say all this on the phone- I am OLD, and I have this to say to the young people that object to having done, for old people , what is being done- what you do now to help old people will help you because the only way you can keep from being old, is by dying young.

Male leaders have got to know how to get a balance struck between the reproducing species NEEDS and this earths resources - To understand the needs of all people, study your own- it will lead to being able to see the logic in the command, love thy neighbor. Pursue happiness by making sure the neighbors NEEDS are being <sup>met</sup> as adequately as you want your own needs met- and make sure all neighbors know about loving their neighbors-

Study what the human species is up against in trying to survive on planet , earth and you can see the logic in the law- thou shalt not kill. "

I really like Booknotes - when Paul Kennedys book was being discussed , Preparing for the Twenty First Century- and he talked about how much rewriting had to be

done - I decided to stick to letter writing because 85 year old women do not have that much time.

I do more writing than reading, any more.

Too much has been taken for granted because people want to give their mind and time to making a living, money- not to knowing basic TRUTH, like the truth about our own human two SEX species, its leader, its male.

Wars advocate being brutal, using weapons, GUNS, killing people as the RIGHT way to solve social problems-

Give men the kind of training they are given in the army, its training in being BRUTAL, it encourages in men, what the Bible, with its laws- tried to discourage- mans male instincts- and the result is a big crop of criminals- If men use the army way in trying to get their own, personal, social, problems solved they are jailed, hung, shot, electrocuted, given lethal injections- It make me question the human species intelligence. Mans right to control human minds and lives with his old established MALE beliefs-

Sincerely,

Mrs.
