

C-SPAN

WASHINGTON DC

Dear C-Span,

Greetings to C-Span's hard workers. Are you working overtime to make King George's superspin a great success? Too bad you couldn't put some of that zeal into an honest delivery of unbiased sources.. So sad that you must always cheat and lie like the royal S & L conservative contributors of loot to the Bush party..Or would you suggest that the great embezzlement fiasco was some communist plot or Democrat party ripoff? We notice that as soon as the corporate mainstream TV-press hung that five per cent of the theft that they could on the Keating Five they ran off and dropped it like a hot potato.. Too much danger of finding that the other 95% of the thieves were Bush and company and the "republican" fortune 500 and the 400 best Kennebunkport families?

We seem to be entering a post-heroic ~~pr~~period of economic shock, fading expectations and martial imperial nostalgia but those at C-Span keep at it, busily rerunning crudely edited ~~propa-~~ganda newsreel and videotape of yesterday's expeditions of glory, power and supposedly mortal struggle. The three scenarios which our modern ideological editors try so desperately to equate are WWII, the cold war proper and Poppy's pathetic massacres which they graspingly attempt to portray as heroic and inextricably linked to the first two episodes.

We see through all this absurdity as it becomes obvious how desperate the men of that generational reign of our long retreat from democracy have become, to extend the vanished cold war, to try to make it last forever, since it worked so marvelously, just

as its creators had intended^d for it to do, to scare the American people to death, making them malleable, docile anti-union soldiers in Reaction's long war against the world. How frantically they now seize on one cooked up war scenario after another, desperately trying to find that foreign subversive enemy who will justify the continuation of their National Security state of secret power, unlimited covert agendas and that wonderful decades-long free access to the U.S. treasury which has funded their fascist agenda for so long and given them a free ride in redbaiter U.S. politics.

Every day it becomes more obvious that these men are dinosaurs of the past. The whole world knowsⁱt. Only in blanketed TV-controlled America where the polled-out prols have no access to unfiltered news, but only to trash, lies and heavily edited videotape is there a total mental blackout. The trick is to keep them asleep or mesmerized by that tube tool until they are safely past the next election and the next - until they are finally safely chained up in the accumulated imperial war debts of dwindling empires and past adventures. We see the results^s of 40 years of well controlled media and CIA journalism which has brought us to this end-of-gambit cul de sac. The decades of anti-communist politics has left us this heritage of a political desert. In William H. Chafe's great book, "The Unfinished Journey" he states: "In a world where the ultimate power^{is} to define what is permissible and unpermissible - the crusaders for anti-communism have helped strike from the agenda of acceptable discussion - so many reforms of the greatest significance to free men."

Now we witness the squabbles of losing

losers in the great capitalist struggle. Nothing to sell the world? How well they know the next stage of capital's decline just as they taught it to Brazil, Chile, Venezuela, Argentina and Guatemala. When the "ASSETS" are sold off and the earth despoiled and desertified and as time runs out - third class economic powers always have their helot populations to sell off into slave wage foreign servitude. We have seen it coming for 30 years in our large cities which are nothing but third world poverty class, enclosed embattled enclaves, ghettos and concentration camps of the poor, all zeroed in by well planned lily white national guard contingencies with vengeance on their minds.

The calculated socio-economic class war against our large cities was foreordained once it became clear- after the 1920's and 1930s that they were the new centers of the electoral shift to the despised political party of papists, huns, slavs, hoi polloi and immigrants. It's been all-out covert economic war against the cities since the 1950s and especially since the Sixties as they filled up with people of color!!

Through it all, the flickering images of the lies which are made out to be Leaders, totter and babble and twitch their Ichabod Crane weird elbows and robot-odd fingers at the world in what is supposed to be presidential action or supreme high authority in action. Ridiculous!

The WARRIORS of yesteryear appear through the fog of cold war mythology as the crass lying poseurs they have always been. The real leaders of the long secret colonial experiment of the garrison state were not puppet presidents or statesmen skills but journalist deceivers, expert actors, pundit pretenders, scrib-

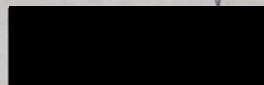

bler hirelings and editor activists. Now the game is left up to the media experts of electronic wizardry and laser hypnosis as they fulfill their role as the last best rearguard hope of the anti-communist political hierarchy who no longer have a clue about what comes next.

The one thing they do know is that there's nothing in the future for pentagoned-out America and it's yellow ribbon cretin slob but bad news and more bills coming due with a Gibraltar of past crimes to pay for in the form of taxes.

The role of the MEDIA MAINSTREAM and the collaborator Congress is to stall, postpone and delay the inevitable as long as possible until the avalanche crashes and it's too late for Joe Sixpack to do anything but bow and accept the final totalittarian dictatorship of the new world order.

That's why Lamb and Bush installed the lap dog Foley in high office - to sell us out as cheaply as possible.

Sincerely

C-SPAN
