I watch C-Span because -----

In the six months that C-Span has been available to me, your service has allowed me to become a better informed citizen with a greater awareness and increased understanding of how our government functions.

In addition, I believe that C-Span is providing an immeasurable public service to this country with its coverage of many topical and/or important issues and concerns of our time. I strongly advocate that C-Span should be required viewing or at least provide national air-time to all citizens regardless of cable availability.

I feel that your service rights a tremendous injustice in that the american people have an increasing responsibility to be a better informed citizenry in this day and age and your service is giving us that opportunity.

Thankyou for improving my awareness of the issues and topics that you cover and keep up the great work.
