

My cable system doesn't offer C-SPAN2 and I don't want them to, One network of political hot air is enough.

However, I would very much like to see "About Books". There is no reason you couldn't show this program on C-SPAN and I greatly resent its restriction to C-SPAN2.

If "About Books" is supposed to be an incentive for people to request C-SPAN 2 from their cable systems, I would hope that C-SPAN would be above such a cheap ploy.
