C - Span
400 North Capitol St.
Washington, D.C. 20001

Dear People;

I watch and like C-Span because it has added two dimension heretofore never incorporated by the news media, first it provides for the first time a medium that brings the American people the news in it's purest form, and that is as it is being made showing all sides uncensored. Bringing all the people involved in National and international issues of importance direct to the American people.

The other deminsion is that it provides an oppertunity for ~~th~~ the people to participate at a National level in political and ~~issu~~ issue discussions. C-Span has removed the sensationalism and patronage that has long been a part of the news media.

I am waiting for the time when C-Span will provide an oppertunity, by inviting members from the Congress on committees who are in the process of passing legislation on their call in program giving the people an oppertunity to offer some suggestions and ask questions.

The result of C-Span programing will be, the best politically educated generations of Americans in our history and will bring about the most dedicated and able men to public office.
