Dear Sir: I am writing to let you know what C-Span means to me.

I'm 33 and blind, and your channel means a lot to me. I've learned more how our government system works and also am more up to date on events affecting me and all peoples of our country.

I've come closer to our system than I ever could from text books I studied in high school in 1969.

I would encourage all students, adults, handicapped (especially) and senior citizens (especially) to watch your programming.

I wish your network would have been available when I was younger.

I would like to congratulate you on a job well done and wish a greater broadening and enlightenment of awareness to us all on what is happening around us and or for us now and in the past and knowledge for the future.

Thanks again.

A Proud viewer, Sincerely,
