Dear Brian:

I never try to call, don't have a fax, do have a pc, so I write, today. I heard your morning program today, March 10, Republicans are still cry-babies... never satisfied unless they are in control 100%. Democracy has been replaced by the profit motive ideology.

I really wonder if we, are not any different position than the German people, upon the thrust of Hitler's politics. I wonder just how far will these Republicans, who I believe have big interests controlling them... will not go along with such interests which will control the government. I have known about Mafia interests, all over the world. I feel we are in like-wise hands if such interests of big corporations, banks and stock holders, only interested in profits, that the American people are being sold by a bill of goods.....

I would like to fill an envelope not unlike tea leaves, without representation from the majority of the people registered to vote. We, I feel are seeing the beginning of our country going down the road with that Mafia-like control.

Your Morning show today, to me was that there are people who want a steady diet of listening, reading, going to certain classes that keep them "Brain-washed". Some of our institutions, such as Libraries, have both side of the issues... books for all.

Will the Libraries here for all be AXED? What other avenues would be axed? Poor winners make tyrants... especially when they want to turn this country into an another Iran, or any other fundamentalist one of the world.

There must be some issue that a grassroot effort can get a handle on what is really important.... instead of the ALL-MIGHTY DOLLAR.

The Republicans were in power just before the 1929 Fall... the only **Hope** we have, is a Democrat President already in the White House.

It was those who lost on the "Stock Market" that jumped out of those windows... I was four years old at the time..... just by the talk of my parents I knew "times" was bad. I never felt I was not physically healthy but at four I was alarmed never-the-less. We living on a farm, had our garden, our cows to milk, and horses to plow the fields. Surely there are some average-Republicans who remember, and should fear what is going on.

My final yardstick! If I hear that school teachers, don't get paid for their work, as happened in the thirties then I will know that de.ja vu historically, has repeated itself.

What a contrast of deliberate efforts of the Senate in contrast of the House of Representatives.... when one group overwhelms another... and this happens in many types of organizations..... the phrase that I remember, (in trying to understand this human failure) of brute control... Is this:..."LIKE A HERD OF ELEPHANTS".... they moved when they

moved...truly the movement of the Republicans in the House of the United States, is truly a herd of Elephants...and Thank God with have a thinking PRESIDENT...With the Heart of Our Country,at stake....and not of some Americans controlling the rest of us.

I feel Brian,that your ideal of balance Media, is lost. Are are saying that if Journalists who do not hold a listeners point of view, that we in calling are striking a balance? Sorry, but we have not the facts to rebuttal,and neither do journalist at times, they themselves are one or two issues journalist, so we are left dangling. Two people,one a consevative and the other not, a refereed program doesn't get the balance either. A third party who has a gift to see"the big picture",MIGHT,JUST MIGHT better ask the bottom line question and understand the bottom line decision of both. Somehow the quality of life should be the undergirding issue...if not then I believe those people of exclusionary vision and wants will control our Country. The problem of the "others"doing us "**in**" is "We" OURSELVES.

Without a liberal educated oriented country of people we will be overtaken by the extremists.

Liberal? Yes,AN informed person, who hopes to always to have the facts, and not dogma-oriented beliefs..is what I hope for our country. Keep trying Brian.I hope for the sake of all of us,that you will find a way to educate all of us.

Have a discussion on the education of the American people-at-large,and let us all learn what we really feel is the most important problem that affects all of daily!

sincerely,

sorry of any and all mistakes,I hope you will understand anyway..this country is important to me..as I have children who I h ope will enherit the earth.
