

Dear Sirs

You people are guilty of a little of dishonesty in the press also.

I notice that when someone on the podium is speaking, you will switch from the speaker to a delegate, that delegate might be questering to a friend, but it looks to the viewer like the delegate is responding to the words of the speaker. Gary Franks, a black was on the podium in one instance and when he made a remark about interpose zones were not enough you switched to a young girl questering, like she did not like what he said. By the way why are you showing so many young people in the audience?
