Dear Sir:

My compliments to you, C Span, for the **excellent** coverage and programming. You are leap years ahead of all media.

I am a satellite owner in rural America. When you had C Span 1 and C Span 2 on Galaxy 3, I was able to conveniently change channels between the two. This made it very nice to be able to keep up with specific issues as well as the broad base of what is going on.

Now you have moved C Span 1 to satellite Satcom C3 and C Span 2 to Satcom C4. This causes some great difficulties for me to keep current in both the House and the Senate. I am forced to choose one, thereby limiting the **whole** picture.

I would like to suggest that you try real hard to move C Span 1 and 2 to one single satellite. This action will afford me to continue to be a well educated and involved voter.

Keep up the good work and please let me know if you will be able to combine C Span 1 and 2 on one satellite. Thank you.

Sincerely;
