

the S+L scandal Had and how much more (10)
that we don't even know the full extent of the
~~treachery~~ Treachery that has went on for years, and
greatly over massive invasion of Panama, what
a job it must be to sell Democracy to other nations?

(a lot of this caused by Ex President Ronald Reagan
and his deregulation of every thing at the same
time and Industrial complexes could do any thing
they wanted to as long as they continued to
produce.)

One thing that has the whole world ^{wondering} is the
Xenon about of Russia and President Gorbachev
To me and the Marxist Lenin theory of Communism
this was not something the U.S. had forced them
into, or out of the goodness of his heart
But the only logical course available to him.
as everyone knows wars are Terribly expensive
both in humanity and material things, the
communist blanket had stretched about as far
as it would go the troops would have to be
called back from Afghanistan because at this
point the theory of practical communism or
or socialism was defeating itself. or while all
of the huge military complex was nice to show off
their people could not eat tanks airplanes
or missiles either

I really believe Gorbachev thought (11)
with the opening of the Berlin wall, so
nothing separated West + East Germany
Many would ~~instantly~~^{INSTANTLY} flee to the West, which
they did, also Poland would raise hell
about their independence. However the
"chainreaction" went one hell of a lot
farther than it was suppose to, because
all satellite countries, and divisions within
Russia itself balked so that Gorbachev
has one hell of a problem, as does president
Bush "How can I get my butt out of this
with out going to Long to or not remaining
to passive either?" And Both, I believe
respect each other, because so much is at
stake, to make any grave or costly errors,
in to hastily a judgement.

I have stated in this letter, some facts, my beliefs
perhaps some suggestions, because in my hand
I hold one of the most powerful, simple invention
ever made, a common pen, because in all I
have stated in this letter about blaming people
for things that have or have not happened I left
out one important person MYSELF It is only
my ~~privilege~~ privilege but also my obligation

It is about time all American wrote to someone ⁽¹²⁾
about the, pollution, radio active waste + fifth that
is destroying this country Today IF we do not do something
drastically and fast we may be murders of our own
grandchildren or great grandchildren by proxy. It is pretty
evident by now its a waste of time to contact the EPA
(EVERY POISON AVAILABLE)

about the only choice left is to contact our own state
Representatives and start demanding that much tougher
laws be enacted within our own state. Especially all
coastal states, if problem areas within our shipping
lanes exists, ^{demmand} ~~insist~~ that all potential dangerous
cargo ships be escorted or have pilot ships show
them their dangerous areas. Also all chemical companies
or industrial complex conform to much stricter laws
with pollution, or be shut down or simply get out.
for every \$100 million that goes for nuclear production
or research ~~1~~ 1/4 or 25 million must go for solving
the nuclear waste problem either convential or military
if enough state governors and representatives can get
together long enough to make it uniform to most all
states then if 2/3 of the states ratify uniform laws
then according to constitution Law it would become
Law enforceable by either state or Federal Government

I watched Earth day or Green Alert (13)
day on T.V. I thought was very inspiring
except for the scam like Dupont and
other Companies trying to claim their
contribution. I'm afraid the only green
they are interested in, is the green they
are shoving in their pockets and in the
Banks.

I love to watch nature shows and to see divers
swim around the huge whales, the Dolphins,
porpoises, and killer whales, isn't strange that
these creatures seem to sense the Brackets of man
and are so careful around them. They claim
that mans brain and the dolphins are about
the same size, isn't it a shame that man
does not possess the same intelligence and
compassion as these peaceful creatures we are
killing off?

When writing to your state or Federal Representatives
state what exactly what you want and make
sure you close "I will Remember you on Election day"
I Thank you
