Dear C-Span,

like show but, why does ^{the} camera focus so rigidly on the speaker almost all the time? Wouldn't the presentation be more interesting and involving if we could see the forum as it is being spoken to? Perhaps to even consider ourselves as a part of that forum. To increase our sense of participation would also give us (the viewers) a larger insight into the focus and content of the speech being made itself.

~~Had~~ Well thanks for your time, I hope you feel that these remarks are worth your consideration.

Cordially

P.S. Do you anticipate any upcoming talks on toxic waste and illegal garbage (esp. as concerns the racketeer riddled garbage, trucking and heavy construction industries) dumping - perhaps even increasing the penalties for such?
